RE: Response to Strawberry River Quarry Inspection dated March 28, 2008

HAND DELIVERED TO MR. HYDE

Dear Mr. Hyde,

The following is our response to your letter of March 28, 2008:

1. Maintain a clean work site. As you can see from photo #2 we have created a fenced yard in which to keep the trash containers, oil drums for equipment, materials, rock and equipment in an organized state. Although the tires, posts, and pipe grizzly shown in photo #1 are: spares for the loader and the pipe grizzly for reclamation, I ask Shannon to remove them from sight of the County Road. The Cat track-hoe is operable but, we will move it into the fenced yard or up on the quarry site as you requested.
2. Comply with all State regulations. No response necessary.
3. Notify all residents within one mile before blasting. No response necessary.
4. Limit hauling on Strawberry River Road to times when it is dry enough to avoid damage to the road. Due to the large amount of water from the heavy snow this year, the spring thaw has developed many soft spots and potholes on the Strawberry River Road one of which existed in front of our quarry site. On March 19, 2008 I contacted Glen Murphy, County Road Supervisor at 823-6483 for

DIV. OF OIL, GAS & MINING

permission to fix that soft spot and gravel the road, he gave his permission but, requested we put small rock on the road. He also informed me that our neighbors to the east had complained because we were grading the road. We hauled in several semi-loads of 1" crushed rock at our expense and top coated the County Road in front of the quarry. I have driven the Strawberry River Road and the section in front of the quarry looks better than any place along the Road.

I have instructed all personnel that trucks must be loaded on the north side of the road thru the yard gate, so that we don't interfere with public travel on the Road. Trucks may be parked parallel to the County Road once in a while, as there was on the day of your March 27<sup>th</sup> inspection but, they won't interfere with traffic flow.

We sincerely feel we are in compliance with the conditions of our Conditional Use Permit and, as I mentioned in our previous meetings if you have any questions, complaints or suggestions my cell phone is on 24 hours a day, 7 days a week # **435-640-3750**. We have completed the minor changes listed herein and are ready for your inspection, Please give me a call.

Sincerely,

Cliff Read, Manager
